

## AMENDMENTS TO THE CLAIMS

**Claim 1 (Currently Amended)** A communication terminal for communicating with a first communication terminal and a second communication terminal via telephone or electronic mail, the communication terminal comprising:

a communication section for receiving, from the first communication terminal, (i) personal information of the first communication terminal, the personal information of the first communication terminal including at least a telephone number of the first communication terminal or an electronic mail address of the first communication terminal, and (ii) a presentation attribute that indicates whether ~~or not a presentation of~~ the personal information of the first communication terminal is permitted to be transmitted to the ~~to a~~ second communication terminal ~~is permitted~~;

a personal information storage section for storing the personal information of the first communication terminal acquired from the first communication terminal and received by the communication section and for storing the presentation attribute acquired from the first communication terminal and received by the communication section;

a personal information determination section for determining, based on the indication of the presentation attribute, whether ~~or not the presentation of~~ the personal information of the first communication terminal stored in the personal information storage section is permitted to be transmitted to the second communication terminal ~~is permitted~~; and

a personal information presentation section for (i) transmitting presenting, to the second communication terminal, via the communication section, the only personal information of the first communication terminal stored in the personal information storage section to the second communication terminal only when that has been determined by the personal information

determination section determines that the presentation attribute indicates that the personal information is to be permitted to be transmitted ~~presented~~ to the second communication terminal, and (ii) prohibiting the communication section from transmitting the personal information of the first communication terminal stored in the personal information storage section to the second communication terminal when the personal information determination section determines that the presentation attribute indicates that the personal information is not permitted to be transmitted to the second communication terminal ~~the personal information presented to the second communication terminal having been acquired from the first communication terminal.~~

**Claim 2 (Currently Amended)**      The communication terminal according to claim 1, wherein the communication section includes a display section operable to display the telephone number or the electronic mail address, wherein the communication section places a telephone call or transmits an electronic mail to at least the first communication terminal, wherein, when the presentation attribute acquired from the first communication terminal indicates that the personal information presentation is permitted to be transmitted to the second communication terminal, the personal information determination section allows the display section of the communication terminal to display the telephone number or the electronic mail address when the communication section places the telephone call or transmits the electronic mail by using the telephone number or the electronic mail address included in the personal information of the first communication terminal stored in the personal information storage section, and

wherein, when the presentation attribute acquired from the first communication terminal indicates that the ~~personal information presentation~~ is not permitted ~~to be transmitted to the second communication terminal~~, the personal information determination section prevents the display section of the communication terminal from displaying the telephone number or the electronic mail address when the communication section places the telephone call or transmits the electronic mail by using the telephone number or the electronic mail address included in the personal information of the first communication terminal stored in the personal information storage section.

**Claim 3 (Currently Amended)**      The communication terminal according to claim 1, wherein,

the personal information storage section stores a presentation attribute of own personal information that has been ~~transmitted-passed~~ to the first communication terminal, and

when the personal information of the first communication terminal is displayed, the presentation attribute of the own personal information that has been ~~transmitted-passed~~ to the first communication terminal is displayed together with the personal information of the first communication terminal.

**Claim 4 (Currently Amended)**      The communication terminal according to claim 3, wherein,

the own personal information includes an expiration time of the own personal information, and

the communication terminal further comprises a personal information update section that (i) checks whether the expiration time of the own personal information that has been transmitted passed to the first communication terminal has expired, and (ii) notifies a user of the communication terminal that the expiration time of the own personal information that has been transmitted passed to the first communication terminal has expired.

**Claim 5 (Previously Presented)** The communication terminal according to claim 1, wherein,

the personal information acquired from the first communication terminal includes an expiration time of the personal information of the first communication terminal, and

the communication terminal further comprises a personal information update section placing restrictions on placing a telephone call or transmitting an electronic mail by using the personal information of the first communication terminal acquired from the first communication terminal if the expiration time of the personal information has expired.

**Claim 6 (Previously Presented)** The communication terminal according to claim 5, wherein the personal information update section notifies a user of the communication terminal that the expiration time of the personal information of the first communication terminal acquired from the first communication terminal has expired and resulted in restrictions being placed on the personal information of the first communication terminal.

**Claim 7 (Previously Presented)** The communication terminal according to claim 5, wherein the personal information update section deletes, from the personal information storage section, personal information of the first communication terminal having an expired expiration time.

**Claim 8 (Previously Presented)** The communication terminal according to claim 1, wherein the communication section transmits or receives the personal information of the first communication terminal and the presentation attribute by utilizing short-distance radio communication, without employing a radio communication network through which a telephone conversation is carried out or an electronic mail is transmitted or received.

**Claim 9 (Previously Presented)** The communication terminal according to claim 1, wherein the communication section transmits or receives the personal information of the first communication terminal and the presentation attribute by utilizing a radio communication network through which a telephone conversation is carried out or an electronic mail is transmitted or received.

**Claim 10 (Currently Amended)** A method for placing restrictions on a disclosure of information employed by a communication terminal which communicates with a first communication terminal and a second communication terminal via telephone or electronic mail, the method comprising the steps of:

receiving, from the first communication terminal, (i) personal information of the first communication terminal, the personal information of the first communication terminal including at least a telephone number of the first communication terminal or an electronic mail address of

the first communication terminal, and (ii) a presentation attribute that indicates whether ~~or not a~~  
~~presentation of the personal information of the first communication terminal is permitted to be~~  
~~transmitted to the~~ to a second communication terminal ~~is permitted~~;

storing the received personal information of the first communication terminal acquired  
from the first communication terminal and received by the receiving step, and storing the  
presentation attribute acquired from the first communication terminal and received by the  
receiving step;

determining, based on the indication of the presentation attribute, whether ~~or not the~~  
~~presentation of the stored personal information of the first communication terminal is permitted~~  
~~to be transmitted~~ to the second communication terminal ~~is permitted~~; and

~~transmitting~~ presenting, to the second communication terminal, only the stored personal  
information of the first communication terminal to the second communication terminal only  
when that has been determined in the determining step determines that the presentation attribute  
indicates that the personal information is to be permitted to be transmitted ~~presented~~ to the  
second communication terminal; and

prohibiting the stored personal information of the first communication terminal from  
being transmitted to the second communication terminal when the determining step determines  
that the presentation attribute indicates that the personal information is not permitted to be  
transmitted to the second communication terminal.

**Claim 11 (Cancelled)**

**Claim 12 (Currently Amended)** A non-transitory computer-readable recording medium having recorded thereon a program to be executed by a communication terminal that communicates with a first communication terminal and a second communication terminal via telephone or electronic mail, the program causing a computer to execute a method comprising:

receiving, from the first communication terminal, (i) personal information of the first communication terminal, the personal information of the first communication terminal including at least a telephone number of the first communication terminal or an electronic mail address of the first communication terminal, and (ii) a presentation attribute that indicates whether or not a presentation of the personal information of the first communication terminal is permitted to be transmitted to the ~~to a second communication terminal is permitted;~~

storing the received personal information of the first communication terminal acquired from the first communication terminal and received by the receiving, and storing the presentation attribute acquired from the first communication terminal and received by the receiving;

determining, based on the indication of the presentation attribute, whether or not the presentation of the stored personal information of the first communication terminal is permitted to be transmitted ~~to the second communication terminal is permitted; and~~

~~transmitting~~ presenting, to the second communication terminal, only the stored personal information of the first communication terminal to the second communication terminal only when that has been determined in the determining determines that the presentation attribute indicates that the personal information is step to be permitted to be transmitted ~~presented to the second communication terminal; and~~

prohibiting the stored personal information of the first communication terminal from being transmitted to the second communication terminal when the determining determines that

the presentation attribute indicates that the personal information is not permitted to be transmitted to the second communication terminal.
